

1. 🥜 Peanut (Groundnut)

Category	Detail
Product Introduction (Nature & Properties)	A globally consumed oilseed, valued for its high oil content (40-50%) and protein. Used for direct consumption (roasting/snacking), crushing for oil, and butter production. They possess a rich, nutty flavor.
Export Types	* Bold/Runner: Elongated shape, large size. Common counts: 38/42, 40/50, 50/60 (Counts per ounce, lower number = bigger size). * Java/Spanish: Round shape, smaller size. Common counts: 50/60, 60/70, 70/80.
Specification (Key Export Metrics)	Moisture: Max 7-8%. Admixture: Max 0.5-1%. Damaged/Splits: Max 3%. Oil Content: Min 40-45%. Aflatoxin: CRITICAL control point. Must meet strict limits (e.g., Max 4 ppb for EU, or Max 20 ppb for other markets).
Harvest Time	October to November (Kharif/main crop) and February to April (Rabi crop).
Shelf Life	6 to 12 Months. Shorter due to high oil content, which is prone to rancidity, and high risk of Aflatoxin development if moisture is not strictly controlled.

2. 🌟 Sesame Seed (Til)

Category	Detail
Product Introduction (Nature & Properties)	Small, flat, oily seeds with a high nutritional value and a distinct nutty flavor. Used whole (baking, confectionery seasoning) or crushed for high-quality edible oil. Known for its strong shelf life due to natural antioxidants.
Export Types	Natural White/Brown Sesame (premium quality is machine-cleaned, 99.95% purity), Hulled Sesame (skin removed, used for baking), and Black Sesame (niche market, high flavor/color).
Specification (Key Export Metrics)	Moisture: Max 6%. Admixture: Max 0.5%. Oil Content: Min 48-50%. Purity: Min 99.5% to 99.95% (Machine cleaned). FFA (Free Fatty Acids): Low. Must be free from Salmonella and Ethylene Oxide (ETO) treatment residues (for specific markets).
Harvest Time	September to October (Kharif) and February to March (Rabi).
Shelf Life	18 to 24 Months (excellent stability due to natural antioxidants). Requires cool, dry, and clean storage.
